

MultiColor Flex 14/15

Product specification sheet

The MultiColor Flex 14 is encased in opal, white plastic, but its low height nevertheless provides it with a visible pitch, and it is therefore particularly suited for indirect lighting installations where the actual conductor film should not be visible.

Let's design our future.

technical drawings

step schematic

* correlated colour temperature of PCB, encapsulation will affect the colour temperature
 ** luminous flux is related to 5.000 K, warmer colour temperatures will reduce the luminous flux, all data are showing typical values, actual lumen output can be less and depends also on surface colour
 *** the LED modules are being delivered without any adhesive tape or glue, aluminum profiles have to be ordered separately, recommendations regarding suitable glue/tapes are being given for individual projects

connection types

VERTICAL CONNECTION

HORIZONTAL CONNECTION

SQUARE CONNECTION

SQUARE/ROUND ENDCAPS
